

Sr. Project Manager Water/Wastewater

Seeking a motivated and talented Senior Project Manager in the water/wastewater area to grow our newest office in western suburbs of Chicago, Illinois. This position requires strong technical, as well as business development skills. The successful candidate will be expected to market and develop business for the firm leveraging their client relationships and past project experience.

Position Requirements:

- Registered professional engineer in the state of Illinois
- Experience in water and/or wastewater design
- Recognize and initiate business development opportunities
- Develop a client base of municipal clients and Chicago area water/wastewater utilities
- Network with new and existing clients to effectively position for and develop work opportunities
- Prepare contract proposals and cost estimates
- Exceptional client relations and customer service skills
- Strong oral and written communication skills, ability to prepare reports and proposals
- Interface directly with clients on projects
- Manage project teams comprised of various engineering and environmental discipline specialists and associated subconsultants
- Manage all project elements including budget, schedule, and quality while striving to achieve both project profitability and client satisfaction
- Assist with water and wastewater operations and research, hydraulic/process modeling, environmental review, permitting, and project financing
- Oversee the production of effective and high-quality project documents (including reports, drawings, and specifications)
- Support projects in construction
- Proficiency using Microsoft Office Suite

Bachelor of Science in Civil Engineering, Master of Science in Civil Engineering preferred. 10+ years Experience
